# Iteration 2: NXTFolio

- **Team members and roles**
    - Chuqi Zhang
    - Cong Fu
    - Haiyang Yu
    - Kehan Meng
    - Shurui Gui
    - Zhao Xu (Product Owner)
    - Zihan Wang (Scrum Master)

- **Customer meeting date/time/place/feedbacks**
    - 2021/11/17, 4:00 PM – 5:00 PM, Zoom
    - Meeting record: https://tamu.zoom.us/rec/share/FRA8qpEVCby4-C3WYkdRekRfJrvlJ35VWANYk5Cm1oNMKVggdvR-imVDgnjs6API.dYLm2VoRV1xkKYYu (Access Password: 9F=CAty8)
    - In the meeting, we showed the customer that we have implemented the feature of agreement on terms and conditions before the final step of new user registration. We also show the implemented feature of check options of fields for registration. Moreover, the modification on the UI of profile page is shown to our customer. The customer is satisfied with the completed features, and he provides valuable comments on both completed and future works. We will continue to work on remaining user stories proposed in the initial plan.

- **Summary**
    - GitHub repo: https://github.com/zihanwang1819/match-my-fashion-public-CodeCreators
    - Pivotal Tracker: https://www.pivotaltracker.com/n/projects/2535985
    - Heroku: https://fashionnxt-fall2021.herokuapp.com

- **User stories implemented in iteration 2**
  - o Feature: Ask user to agree terms and conditions

    As a web owner

    So that I can clarify terms and conditions to users

    I want to display terms and conditions, and ask users to click on agree when register

    With the legacy version, if a new user tries to create a new account at NXTFolio website, the user does not need to agree on any terms and condition before being a registered member. However, this feature is very important since the web owner always need to clarify terms and conditions. Therefore, we add it as a required step before clicking the "save and continue to professional page" button. A separate new window displaying all condition details will pop out by clicking the "terms of service". If the new user does not check the box to agree terms and conditions, clicking the "save and continue to professional page" button will not let the user proceed to complete the registration. A reminder "Please check this box if you want to proceed" will pop out near the checkbox of the agreement. Only after checking this box, the user can proceed to complete the registration process.

    **Before:**

**After:**

- o Feature: Check options of field category details

  As a user

  So that I can clarify the related fields of my work on my profile

  I want to check options of fields including creators, services and makers when register

  During the registration, our customer would like the new user to submit their field category, because field category is one of the most important labels that should be attached to classify users. Therefore, we implement this feature to allow the new user to select options under three subcategories. If the user's answer is not included by provided options, the user can also type their answer in the box after "Others". Finally, the new user's choice will be saved into our database, which can be further queried and used to filter users.

  **Category**

  **Creators**

  ☐ brand_owner ☐ designer Others [                    ]

  **Services**

  ☐ sales ☐ marketing ☐ retail ☐ stylist ☐ blogger ☐ influencer ☐ visual ☐ content_creator ☐ model
  ☐ forecasting ☐ finances Others [                    ]

  **Makers**

  ☐ manufacturing ☐ materials Others [                    ]

- o Feature: Improve profile page user interface

  As a user

  So that I can have strong impression when viewing the profile page of other users

  I want to see well-designed user interface with less white space

  In the last meeting with our customer, the customer expressed his concerns about the profile user interface. He does not want too much white space in the profile page. Hence, we removed the white space behind albums. Also, when putting the mouse on an album

image, instead of displaying all descriptions in a mass, now we make only first several words of the album description will be displayed. During the latest meeting with our customer, he further clarifies that he wants images larger so that can easily attract viewers. We will continue working on this feature in next iteration.

**Before:**

**After:**

- **Test**
  - For the two implemented features about agreeing conditions and checking options of field details, we perform the BDD unit test by cucumber, and have all steps passed for the registration scenario. Codes and log file have been uploaded to the feature folder under our GitHub repo (https://github.com/zihanwang1819/match-my-fashion-public-CodeCreators/tree/develop/features).

o For UI improvements on the profile page, instead of writing code to test the function, we simply observe and check the effect of modifications.
